

D1 HAND-EYE CALIBRATION TARGET

ArUco DICT_4X4_50 - ID 0 - black marker side: 60.0 mm

PRINT AT 100% / ACTUAL SIZE - DO NOT FIT TO PAGE

After printing, measure the black square: it must be 60.0 x 60.0 mm.

Control line: exactly 100 mm

Mount this sheet flat and rigid. Keep it fixed for the entire calibration.
The D456 must see the complete marker, including the white quiet zone.
Use 8-12 different wrist poses with both translation and rotation changes.
The marker is needed only during hand-eye calibration, never during grasping.
